Should Fix:

Eliminate render-blocking JavaScript and CSS in above-the-fold content

Your page has 3 blocking script resources and $\bf 1$ blocking CSS resources. This causes a delay in rendering your page.

None of the above-the-fold content on your page could be rendered without waiting for the following resources to load. Try to defer or asynchronously load blocking resources, or inline the critical portions of those resources directly in the HTML.

Remove render-blocking JavaScript:

- https://s.bs.to/js/jquery.js
- https://s.bs.to/js/heartcode-canvas-loader.js
- https://s.bs.to/js/main.min.js

Optimize CSS Delivery of the following:

https://s.bs.to/site.min.css

Consider Fixing:

Leverage browser caching

Setting an expiry date or a maximum age in the HTTP headers for static resources instructs the browser to load previously downloaded resources from local disk rather than over the network.

Leverage browser caching for the following cacheable resources:

- https://bs.to/ajax/reload-modules.php (expiration not specified)
- https://static.doubleclick.net/instream/ad_status.js (15 minutes)
- https://www.google-analytics.com/analytics.js (2 hours)

Optimize images

Properly formatting and compressing images can save many bytes of data.

Optimize the following images to reduce their size by 10.5KiB (80% reduction).

- Compressing https://s.bs.to/img/smileys/surprised.png could save 2.7KiB (79% reduction).
- Compressing https://s.bs.to/img/smileys/heart.png could save 2.6KiB (83% reduction).
- Compressing https://s.bs.to/img/smileys/smiling.png could save 2.6KiB (78% reduction).
- Compressing https://s.bs.to/img/smileys/tongue_out.png could save 2.6KiB (78% reduction).

63 / 100 User Experience

Mobile

Should Fix:

Configure the viewport

Your page does not have a viewport specified. This causes mobile devices to render your page as it would appear on a desktop browser, scaling it down to fit on a mobile screen. Configure a viewport to allow your page to render properly on all devices.

Configure a viewport for this page.

Size tap targets appropriately

Some of the links/buttons on your webpage may be too small for a user to easily tap on a touchscreen. Consider making these tap targets larger to provide a better user experience.

The following tap targets are close to other nearby tap targets and may need additional spacing around them.

- The tap target Lsername: and 1 others are close to other tap targets final.
- The tap target <input type="text" name="login[user]"> and 1 others are close to other tap targets final.
- The tap target <label id="rememberLogin">Angemeldet bleiben</label> is close to 4 other tap targets final.
- The tap target <input type="checkbox" name="login[remember]"> is close to 3 other tap targets final.
- The tap target <input type="submit"> is close to 4 other tap targets final.
- The tap target Registrieren and 10 others are close to other tap targets final.
- The tap target Alle Serien and 3 others are close to other tap targets final.
- The tap target Simpsons is close to 1 other tap targets final.
- The tap target RosaPummelfee and 8 others are close to other tap targets final.

- The tap target Song of the Day! and 1 others are close to other tap targets final.
- The tap target <button class="ytp-button ytp-share-button"></button> is close to 1 other tap targets final.

Use legible font sizes

The following text on your page renders in a way that may be difficult for some of your visitors to read. <u>Use legible font sizes</u> to provide a better user experience.

The following text fragments have a small font size. Increase the font size to make them more legible.

- Leider mussten...zurückfindet. and 23 others render only 6 pixels tall (16 CSS pixels) final.
- Angemeldet bleiben renders only 5 pixels tall (13 CSS pixels) final.
- A.D.: Rebellen und Märtyrer and 22 others render only 6 pixels tall (16 CSS pixels) final.
- Burning Series...n online sehen and 3 others render only 7 pixels tall (19 CSS pixels) final.
- 3000 verschiedene Serien and 1 others render only 6 pixels tall (16 CSS pixels) final.
- kostenlos online sehen and 3 others render only 6 pixels tall (16 CSS pixels) final.
- How I Met Your Mother and 2 others render only 6 pixels tall (16 CSS pixels) final.
- RosaPummelfee and 9 others render only 6 pixels tall (16 CSS pixels) final.
- 12:41:07 and 12 others render only 5 pixels tall (13 CSS pixels) final.
- Saltatio Morti...fficial Video) renders only 7 pixels tall (18 CSS pixels) final.
- Your browser d...ats available. renders only 5 pixels tall (14 CSS pixels) final.
- Click here to...t HTML5 video. renders only 5 pixels tall (14 CSS pixels) final.
- bs.to renders only 6 pixels tall (16 CSS pixels) final.

Avoid plugins

Your page does not appear to use plugins, which would prevent content from being usable on many platforms. Learn more about the importance of <u>avoiding plugins</u>.

Size content to viewport

The contents of your page fit within the viewport. Learn more about sizing content to the viewport.
