## Eliminate render-blocking JavaScript and CSS in above-the-fold content

Your page has 2 blocking script resources and 4 blocking CSS resources. This causes a delay in rendering your page.

None of the above-the-fold content on your page could be rendered without waiting for the following resources to load. Try to defer or asynchronously load blocking resources, or inline the critical portions of those resources directly in the HTML.

### [Remove render-blocking JavaScript:](#)

- <https://officecom-setup.org/code.jquery.com/jquery-latest.min.js>
- <https://officecom-setup.org/cdnjs.cloudflare.com/ajax/libs/jstimezonedetect/1.0.6/jstz.min.js>

### [Optimize CSS Delivery](#) of the following:

- <https://officecom-setup.org/maxcdn.bootstrapcdn.com/font-awesome/4.3.0/css/font-awesome.min.css>
- <https://officecom-setup.org/img/style.css>
- <https://officecom-setup.org/stylesheet.css>
- <https://officecom-setup.org/img/style.css>

## Optimize images

Properly formatting and compressing images can save many bytes of data.

[Optimize the following images](#) to reduce their size by 658.9KiB (78% reduction).

- Compressing and resizing <https://officecom-setup.org/images/Twitter-blue.png> could save 620.4KiB (99% reduction).
- Compressing <https://officecom-setup.org/image/off.png> could save 19.6KiB (15% reduction).
- Compressing <https://officecom-setup.org/officesetup/images/office365.png> could save 12.3KiB (25% reduction).
- Compressing <https://officecom-setup.org/images/key-box.png> could save 5.2KiB (17% reduction).

## Mobile

- Compressing [https://ssl.microsofttranslator.com/static/25481438/img/binglogo\\_dark.png](https://ssl.microsofttranslator.com/static/25481438/img/binglogo_dark.png) could save 996B (68% reduction).
- Compressing <https://ssl.microsofttranslator.com/static/25481438/img/bingmark.png> could save 122B (34% reduction).

### Consider Fixing:

#### Minify CSS

Compacting CSS code can save many bytes of data and speed up download and parse times.

[Minify CSS](#) for the following resources to reduce their size by 7.9KiB (18% reduction).

- Minifying <https://officecom-setup.org/img/style.css> could save 6KiB (17% reduction).
- Minifying <https://officecom-setup.org/stylesheet.css> could save 1.6KiB (22% reduction).
- Minifying <https://ssl.microsofttranslator.com/static/25481438/css/WidgetV3.css?v=25481438> could save 325B (12% reduction) after compression.

#### Minify HTML

Compacting HTML code, including any inline JavaScript and CSS contained in it, can save many bytes of data and speed up download and parse times.

[Minify HTML](#) for the following resources to reduce their size by 7.8KiB (31% reduction).

- Minifying <https://officecom-setup.org/> could save 7.8KiB (31% reduction).

## Leverage browser caching

Setting an expiry date or a maximum age in the HTTP headers for static resources instructs the browser to load previously downloaded resources from local disk rather than over the network.

## Eliminate render-blocking JavaScript and CSS in above-the-fold content

Your page has 2 blocking script resources and 4 blocking CSS resources. This causes a delay in rendering your page.

None of the above-the-fold content on your page could be rendered without waiting for the following resources to load. Try to defer or asynchronously load blocking resources, or inline the critical portions of those resources directly in the HTML.
