

MyWifiext Setup For Netgear Range Extender  
Boost Your Existing Wifi Range  
Call Toll Free- 1-855-439-4345

### WHAT IS MYWIFIEXT

When it comes to **setting up a Wi-Fi Range Extender**, there is a lot that you need to do on your computer. You should understand that Extender setup involves going to a dedicated website, which happens to be mywifiext, so if you were searching for what is mywifiext, then I hope now you are aware of it. If you are using a Windows computer, then you can log on to [www.mywifiext.net](http://www.mywifiext.net), but if yours is a Mac computer, then the address changes to [www.mywifiext.local](http://www.mywifiext.local).

It is through these web addresses that you will be able to **set up your extender** in the most suitable way. If you are not able to access either of the links, then you need to check whether the internet connection is properly working or not. If internet is available on your devices, but not on your extender, then it means, the router and extender configuration was not successful. So, what you have to do is, you will have to configure the extender with the router in the right way.

### WWW.MYWIFIEXT.NET NEW EXTENDER SETUP

If you have just bought a WiFi Extender and looking to set it up for the first time, then it will not be as easy as you think. You will have to follow certain steps, which you can only get by getting in touch with experts. From experience, it is difficult to connect for the first use. For the first connection, especially in WPS, the extender must be connected to a computer. If however the extender is reluctant to connect, use the connection assistant included in the manual using the address **pagepeeker**
