Eliminate render-blocking JavaScript and CSS in above-the-fold content

Mobile

Your page has 4 blocking script resources and 2 blocking CSS resources. This causes a delay in rendering your page.

None of the above-the-fold content on your page could be rendered without waiting for the following resources to load. Try to defer or asynchronously load blocking resources, or inline the critical portions of those resources directly in the HTML.

[Remove render-blocking JavaScript]():

- https://ajax.googleapis.com/ajax/libs/jquery/1.6.4/jquery.min.js

- https://www.1forexforum.com/clientscript/vbulletin-mobile-init.js?v=422

- https://www.1forexforum.com/clientscript/jquery/jquery.mobile-1.0.vb.js?v=422

- https://www.1forexforum.com/clientscript/vbulletin-mobile.js?v=422

[Optimize CSS Delivery]() of the following:

- https://www.1forexforum.com/clientscript/jquery/jquery.mobile-1.0.min.css?v=422

- https://www.1forexforum.com/css.php?styleid=30&langid=1&d=1513009112&td=ltr&sheet=bbcode.css,editor.css,popupmenu.css,reset-fonts.css,vbulletin.css,vbulletin-chrome.css,vbulletin-formcontrols.css,

🔔 Consider Fixing:

Leverage browser caching

Setting an expiry date or a maximum age in the HTTP headers for static resources instructs the browser to load previously downloaded resources from local disk rather than over the network.

[Leverage browser caching]() for the following cacheable resources:

- https://www.1forexforum.com/clientscript/jquery/images/ajax-loader.png (expiration not specified)

- https://www.1forexforum.com/clientscript/jquery/images/icons-36-white.png (expiration not specified)

Minify CSS

Compacting CSS code can save many bytes of data and speed up download and parse times.

Minify CSS for the following resources to reduce their size by 479B (11% reduction).

- Minifying https://www.1forexforum.com/css.php?styleid=30&langid=1&d=1513009112&td= ltr&sheet=bbcode.css,editor.css,popupmenu.css,reset-fonts.css,vbulletin.css,vbulletin-chrome.css,vbulletin-formcontrols.css, could save 479B (11% reduction) after compression.

Optimize images

Properly formatting and compressing images can save many bytes of data.

Optimize the following images to reduce their size by 2.4KiB (57% reduction).

- Compressing https://www.1forexforum.com/images/mobile/vbulletin-logo.png could save 2.4KiB (57% reduction).

Prioritize visible content

Your page requires additional network round trips to render the above-the-fold content. For best performance, reduce the amount of HTML needed to render above-the-fold content.

Mobile

The entire HTML response was not sufficient to render the above-the-fold content. This usually indicates that additional resources, loaded after HTML parsing, were required to render above-the-fold content. [Prioritize visible content](#) that is needed for rendering above-the-fold by including it directly in the HTML response.

- Only about 7% of the final above-the-fold content could be rendered with the full HTML response snapshot:6.
