Leverage browser caching

Setting an expiry date or a maximum age in the HTTP headers for static resources instructs the browser to load previously downloaded resources from local disk rather than over the network.

Eliminate render-blocking JavaScript and CSS in above-the-fold content

Your page has 16 blocking script resources and 10 blocking CSS resources. This causes a delay in rendering your page.

None of the above-the-fold content on your page could be rendered without waiting for the following resources to load. Try to defer or asynchronously load blocking resources, or inline the critical portions of those resources directly in the HTML.

[Remove render-blocking JavaScript:](#)

Consider Fixing:

Size tap targets appropriately

Some of the links/buttons on your webpage may be too small for a user to easily tap on a touchscreen. Consider [making these tap targets larger](#) to provide a better user experience.

The following tap targets are close to other nearby tap targets and may need additional spacing around them.

- The tap target `فارسي` and 1 others are close to other tap targets final.
- The tap target `أخبار` and 10 others are close to other tap targets final.
- The tap target `الأميركية الانتخابات 2016` and 1 others are close to other tap targets final.

Eliminate render-blocking JavaScript and CSS in above-the-fold content

Your page has 16 blocking script resources and 10 blocking CSS resources. This causes a delay in rendering your page.

Desktop

None of the above-the-fold content on your page could be rendered without waiting for the following resources to load. Try to defer or asynchronously load blocking resources, or inline the critical portions of those resources directly in the HTML.
