### Leverage browser caching

Setting an expiry date or a maximum age in the HTTP headers for static resources instructs the browser to load previously downloaded resources from local disk rather than over the network.

## Eliminate render-blocking JavaScript and CSS in above-the-fold content

Your page has 2 blocking script resources and 9 blocking CSS resources. This causes a delay in rendering your page.

None of the above-the-fold content on your page could be rendered without waiting for the following resources to load. Try to defer or asynchronously load blocking resources, or inline the critical portions of those resources directly in the HTML.

### [Remove render-blocking JavaScript:](#)

### Consider Fixing:

#### Enable compression

Compressing resources with gzip or deflate can reduce the number of bytes sent over the network.

[Enable compression](#) for the following resources to reduce their transfer size by 4.7KiB (66% reduction).

- Compressing <http://alexisutnl452.simplesite.com/userPages/pages/FrontendAppLocalePage.aspx?CultureKey=en-US> could save 3.8KiB (69% reduction).
- Compressing <http://alexisutnl452.simplesite.com/c/js/version3/libs/stickyheadernavbar.js> could save 554B (66% reduction).
- Compressing <http://alexisutnl452.simplesite.com/images/Version4/hamb.svg> could save 366B (50% reduction).

#### Reduce server response time

In our test, your server responded in 0.22 seconds.

There are many factors that can slow down your server response time. [Please read our recommendations](#) to learn how you can monitor and measure where your server is spending the most time.

## 92 / 100 User Experience

### Consider Fixing:

## Avoid plugins

Your page uses plugins, which prevents portions of your page from being used on many platforms. [Find alternatives for plugin based content](#) to increase compatibility.

Find alternatives for the following Flash plugins.

- [http://alexisutnl452.simplesite.com/Images/sm297/soundmanager2\\_flash9.swf](http://alexisutnl452.simplesite.com/Images/sm297/soundmanager2_flash9.swf) (8 x 8) final.

## Size tap targets appropriately

Some of the links/buttons on your webpage may be too small for a user to easily tap on a touchscreen. Consider [making these tap targets larger](#) to provide a better user experience.

The following tap targets are close to other nearby tap targets and may need additional spacing around them.

- The tap target `<a href="http://www.bbc...russian brides">http://www.bbc...russian brides</a>` and 4 others are close to other tap targets.
