⬛ Should Fix:

Avoid landing page redirects

Your page has 2 redirects. Redirects introduce additional delays before the page can be loaded.

Avoid landing page redirects for the following chain of redirected URLs.

- http://baidu.com/

- http://www.baidu.com/

Prioritize visible content

Your page requires additional network round trips to render the above-the-fold content. For best
performance, reduce the amount of HTML needed to render above-the-fold content.

The entire HTML response was not sufficient to render the above-the-fold content. This usually
indicates that additional resources, loaded after HTML parsing, were required to render above-the-
fold content. Prioritize visible content that is needed for rendering above-the-fold by including it
directly in the HTML response.

- Only about 17% of the final above-the-fold content could be rendered with the full HTML
response snapshot:2.

⚠ Consider Fixing:

Leverage browser caching

Setting an expiry date or a maximum age in the HTTP headers for static resources instructs the

browser to load previously downloaded resources from local disk rather than over the network.

[Leverage browser caching](#) for the following cacheable resources:

- https://gss0.bdstatic.com/5bd1bjqh_Q23odCf/static/wiseindex/iconfont/iconfont_11a872b9.woff (expiration not specified)

⚠️ Consider Fixing:

Size tap targets appropriately

Some of the links/buttons on your webpage may be too small for a user to easily tap on a touchscreen. Consider [making these tap targets larger](#) to provide a better user experience.

The following tap targets are close to other nearby tap targets and may need additional spacing around them.

- The tap target <div class="baiduapp-icon"> is close to 1 other tap targets final.

- The tap target □□□□□□□□□200% is close to 3 other tap targets.

- The tap target □□□□□□□□□200% is close to 3 other tap targets.

- The tap target □□□□□□□□ Baidu □ICP□030173□ is close to 2 other tap targets.

⚠ Consider Fixing:

Eliminate render-blocking JavaScript and CSS in above-the-fold content

Your page has 1 blocking script resources. This causes a delay in rendering your page.

Approximately 44% of the above-the-fold content on your page could be rendered without waiting for the following resources to load. Try to defer or asynchronously load blocking resources, or inline the critical portions of those resources directly in the HTML.
