Eliminate render-blocking JavaScript and CSS in above-the-fold content

Your page has 26 blocking script resources and 4 blocking CSS resources. This causes a delay in

Mobile

rendering your page.

None of the above-the-fold content on your page could be rendered without waiting for the following resources to load. Try to defer or asynchronously load blocking resources, or inline the critical portions of those resources directly in the HTML.

Prioritize visible content

Your page requires additional network round trips to render the above-the-fold content. For best performance, reduce the amount of HTML needed to render above-the-fold content.

The entire HTML response was not sufficient to render the above-the-fold content. This usually indicates that additional resources, loaded after HTML parsing, were required to render above-the-fold content. [Prioritize visible content](#) that is needed for rendering above-the-fold by including it directly in the HTML response.

- Only about 50% of the final above-the-fold content could be rendered with the full HTML response snapshot:31.

Consider Fixing:

Avoid landing page redirects

Your page has 2 redirects. Redirects introduce additional delays before the page can be loaded.

[Avoid landing page redirects](#) for the following chain of redirected URLs.

- <http://chainreactioncycles.com/>
- <http://www.chainreactioncycles.com/>
- <http://www.chainreactioncycles.com/us/en>

Minify CSS

Compacting CSS code can save many bytes of data and speed up download and parse times.

[Minify CSS](#) for the following resources to reduce their size by 13.4KiB (20% reduction).

- Minifying <http://www.chainreactioncycles.com/static/css/common/crccombinedcss.css> could save 13.4KiB (20% reduction) after compression.

Eliminate render-blocking JavaScript and CSS in above-the-fold content

Your page has 17 blocking script resources and 5 blocking CSS resources. This causes a delay in rendering your page.

None of the above-the-fold content on your page could be rendered without waiting for the following resources to load. Try to defer or asynchronously load blocking resources, or inline the critical portions of those resources directly in the HTML.

[Remove render-blocking JavaScript:](#)
