Should Fix:

Eliminate render-blocking JavaScript and CSS in above-the-fold content

Your page has 11 blocking script resources and 8 blocking CSS resources. This causes a delay in rendering your page.

None of the above-the-fold content on your page could be rendered without waiting for the following resources to load. Try to defer or asynchronously load blocking resources, or inline the critical portions of those resources directly in the HTML.

Consider Fixing:

Leverage browser caching

Setting an expiry date or a maximum age in the HTTP headers for static resources instructs the browser to load previously downloaded resources from local disk rather than over the network.

[Leverage browser caching](#) for the following cacheable resources:

Mobile

- <http://pagead2.googlesyndication.com/pagead/js/adsbygoogle.js> (60 minutes)
- <http://www.google-analytics.com/analytics.js> (2 hours)
- <https://www.google-analytics.com/analytics.js> (2 hours)

Minify CSS

Compacting CSS code can save many bytes of data and speed up download and parse times.

[Minify CSS](#) for the following resources to reduce their size by 3.4KiB (28% reduction).

- Minifying <http://eapplyonline.in/wp-content/themes/education-hub/style.css?ver=1.9.6> could save 3.3KiB (28% reduction) after compression.
- Minifying <http://eapplyonline.in/wp-content/plugins/jetpack/modules/widgets/social-icons/social-icons.css?ver=20170506> could save 168B (30% reduction) after compression.

Optimize images

Properly formatting and compressing images can save many bytes of data.

Prioritize visible content

Your page requires additional network round trips to render the above-the-fold content. For best performance, reduce the amount of HTML needed to render above-the-fold content.

The entire HTML response was not sufficient to render the above-the-fold content. This usually indicates that additional resources, loaded after HTML parsing, were required to render above-the-fold content. [Prioritize visible content](#) that is needed for rendering above-the-fold by including it directly in the HTML response.

- Only about 5% of the final above-the-fold content could be rendered with the full HTML response.

Consider Fixing:

Size tap targets appropriately

Some of the links/buttons on your webpage may be too small for a user to easily tap on a touchscreen. Consider [making these tap targets larger](#) to provide a better user experience.

The following tap targets are close to other nearby tap targets and may need additional spacing around them.

- The tap target `` is close to 1 other tap targets final.
- The tap target `` is close to 1 other tap targets final.
- The tap target `<input type="submit" class="search-submit">` is close to 1 other tap targets final.
- The tap target `Answer Key` and 207 others are close to other tap targets final.
- The tap target `<div id="abgc" class="abgc"></div>` is close to 1 other tap targets.

Mobile

- The tap target `Rajasthan Poli...eck Answer Key` and 11 others are close to other tap targets.
- The tap target `SSC CHSL Exam...Off Marks 2018` and 4 others are close to other tap targets.
- The tap target `WEN Themes` is close to 1 other tap targets.
