Should Fix:

Eliminate render-blocking JavaScript and CSS in above-the-fold content

Your page has 2 blocking script resources and 2 blocking CSS resources. This causes a delay in rendering your page.

None of the above-the-fold content on your page could be rendered without waiting for the following resources to load. Try to defer or asynchronously load blocking resources, or inline the critical portions of those resources directly in the HTML.

[Remove render-blocking JavaScript:](#)

- <https://www.electricianslondon.org/wp-content/cache/minify/df983.js>
- <https://www.electricianslondon.org/wp-content/cache/minify/a6c57.js>

[Optimize CSS Delivery](#) of the following:

- <https://www.electricianslondon.org/wp-content/cache/minify/f5c90.css>

Mobile

- <https://fonts.googleapis.com/css?family=Open+Sans:300italic,400italic,600italic,700italic,800italic,400,300,600,700,800&subset=latin,latin-ext>

Consider Fixing:

Leverage browser caching

Setting an expiry date or a maximum age in the HTTP headers for static resources instructs the browser to load previously downloaded resources from local disk rather than over the network.

[Leverage browser caching](#) for the following cacheable resources:

- https://static.doubleclick.net/instream/ad_status.js (15 minutes)
- <https://www.googletagmanager.com/gtag/js?id=UA-124841203-1> (15 minutes)
- <https://maps.googleapis.com/maps/api/js?v=3&key=AlzaSyBQWRUHACgI5tYxOF4YikDE8Xibu5d8nRs&ver=3.18.7> (30 minutes)
- <https://www.google-analytics.com/analytics.js> (2 hours)

Reduce server response time

In our test, your server responded in 0.38 seconds.

There are many factors that can slow down your server response time. [Please read our recommendations](#) to learn how you can monitor and measure where your server is spending the most time.

Optimize images

Properly formatting and compressing images can save many bytes of data.

[Optimize the following images](#) to reduce their size by 16.7KiB (16% reduction).

- Compressing <https://www.electricianslondon.org/wp-content/uploads/2018/08/Electricians-London.jpg> could save 10.5KiB (14% reduction).
- Compressing <https://www.electricianslondon.org/wp-content/uploads/2018/08/London-Electricians.jpg> could save 5.5KiB (19% reduction).
- Compressing <https://yt3.ggpht.com/-Ry5z6VPUEMY/AAAAAAAAAAI/AAAAAAAAAA/MxywJWcnwN8/s68-c-k-no-mo-rj-c0x0xffff/photo.jpg> could save 780B (40% reduction).

97 / 100 User Experience

! Consider Fixing:

Size tap targets appropriately

Some of the links/buttons on your webpage may be too small for a user to easily tap on a touchscreen. Consider [making these tap targets larger](#) to provide a better user experience.

The following tap targets are close to other nearby tap targets and may need additional spacing around them.

- The tap target `info@electricianslondon.org` is close to 2 other tap targets final.
- The tap target `<input type="search" name="s" class="et-search-field">` is close to 1 other tap targets final.
- The tap target `` is close to 2 other tap targets final.
- The tap target `<div></div>` is close to 4 other tap targets.
- The tap target `<div class="gm-style-mtc">MapTerrain</div>` is close to 1 other tap targets.
- The tap target `<div>Map</div>` is close to 1 other tap targets.
- The tap target `Home` is close to 1 other tap targets.
- The tap target `About Us` and 4 others are close to other tap targets.
- The tap target `Electricians London` and 1 others are close to other tap targets.
