www.office.com/setup

Know everything about ms office setup and install from www.office.com/setup. Get answers for your queries:

How to download MS office from www.office.com/setup

- Where to enter office setup product key?
- Where to find office setup product key?
- How to enter office setup product key?
- How to download and install MS office setup?

81 / 100 Speed

 Should Fix:

Eliminate render-blocking JavaScript and CSS in above-the-fold content

Your page has 2 blocking CSS resources. This causes a delay in rendering your page.

None of the above-the-fold content on your page could be rendered without waiting for the following resources to load. Try to defer or asynchronously load blocking resources, or inline the critical portions of those resources directly in the HTML.

[Optimize CSS Delivery](#) of the following:

- <http://en-us-office.com/css/style.css>
- <http://en-us-office.com/css/bootstrap.css>

 Consider Fixing:

Leverage browser caching

Setting an expiry date or a maximum age in the HTTP headers for static resources instructs the browser to load previously downloaded resources from local disk rather than over the network.

[Leverage browser caching](#) for the following cacheable resources:

- <http://en-us-office.com/css/bootstrap.css> (4 hours)
- <http://en-us-office.com/css/font-awesome.css> (4 hours)
- <http://en-us-office.com/css/style.css> (4 hours)
- <http://en-us-office.com/img/activate-office-setup.png> (4 hours)
- <http://en-us-office.com/img/logo.png> (4 hours)
- <http://en-us-office.com/img/office-setup-download-and-install.png> (4 hours)
- http://en-us-office.com/img/office_com_setup.jpg (4 hours)
- <http://en-us-office.com/img/where-to-enter-office-setup-product-key.png> (4 hours)

Optimize images

Properly formatting and compressing images can save many bytes of data.

[Optimize the following images](#) to reduce their size by 272B (26% reduction).

- Compressing <http://en-us-office.com/img/logo.png> could save 272B (26% reduction).

Prioritize visible content

You have the above-the-fold content properly prioritized. Learn more about [prioritizing visible content](#).

89 / 100 User Experience

 Should Fix:

Mobile

Size content to viewport

The page content is too wide for the viewport, forcing the user to scroll horizontally. [Size the page content to the viewport](#) to provide a better user experience.

The page content is 515 CSS pixels wide, but the viewport is only 412 CSS pixels wide. The following elements fall outside the viewport:

- The element `` falls outside the viewport.

4 Passed Rules

Avoid plugins

Your page does not appear to use plugins, which would prevent content from being usable on many platforms. Learn more about the importance of [avoiding plugins](#).

Configure the viewport

Your page specifies a viewport matching the device's size, which allows it to render properly on all devices. Learn more about [configuring viewports](#).

Size tap targets appropriately

All of your page's links/buttons are large enough for a user to easily tap on a touchscreen. Learn more about [sizing tap targets appropriately](#).

Use legible font sizes

The text on your page is legible. Learn more about [using legible font sizes](#).
