Lợi ích của việc đọc sách – kể chuyện cho trẻ theo thời kỳ phát triển trí não

BY BÁC SĨ ANH NGUYEN | 20/12/2018

Không ít cha mẹ băn khoăn làm sao giúp trẻ hứng thú khi được cha mẹ đọc sách -kể chuyện. Liệu việc trẻ cứ loay hoay không tập trung lúc đọc sách có mang lợi ích gì đến phát triển não bộ của...

Should Fix:

Eliminate render-blocking JavaScript and CSS in above-the-fold content

Your page has 4 blocking script resources and 9 blocking CSS resources. This causes a delay in rendering your page.

None of the above-the-fold content on your page could be rendered without waiting for the following resources to load. Try to defer or asynchronously load blocking resources, or inline the critical portions of those resources directly in the HTML.

Optimize images

Properly formatting and compressing images can save many bytes of data.

[Optimize the following images](#) to reduce their size by 174.1KiB (76% reduction).

- Compressing <https://familyaz.net/wp-content/uploads/2018/02/phuong-phap-an-dam-avt.jpg> could save 174.1KiB (76% reduction).

Consider Fixing:

Leverage browser caching

Setting an expiry date or a maximum age in the HTTP headers for static resources instructs the browser to load previously downloaded resources from local disk rather than over the network.

Mobile

99 / 100 User Experience

Consider Fixing:

Size tap targets appropriately

Mobile

Some of the links/buttons on your webpage may be too small for a user to easily tap on a touchscreen. Consider [making these tap targets larger](#) to provide a better user experience.

The following tap targets are close to other nearby tap targets and may need additional spacing around them.

- The tap target `20/12/2018` and 25 others are close to other tap targets final.
- The tap target `29/07/2018` is close to 1 other tap targets.
- The tap target `Liên hệ` and 5 others are close to other tap targets.

Prioritize visible content

Your page requires additional network round trips to render the above-the-fold content. For best performance, reduce the amount of HTML needed to render above-the-fold content.

The entire HTML response was not sufficient to render the above-the-fold content. This usually indicates that additional resources, loaded after HTML parsing, were required to render above-the-fold content. [Prioritize visible content](#) that is needed for rendering above-the-fold by including it directly in the HTML response.

- Only about 41% of the final above-the-fold content could be rendered with the full HTML response.
