

PageSpeed Insights

Mobile

44 / 100 Speed

Should Fix:

Avoid landing page redirects

Your page has 2 redirects. Redirects introduce additional delays before the page can be loaded.

[Avoid landing page redirects](#) for the following chain of redirected URLs.

- <http://funftesrad.com/>
- <https://funftesrad.com/>
- <https://www.funftesrad.com/>

Reduce server response time

Mobile

In our test, your server responded in 1.3 seconds.

There are many factors that can slow down your server response time. [Please read our recommendations](#) to learn how you can monitor and measure where your server is spending the most time.

Eliminate render-blocking JavaScript and CSS in above-the-fold content

Your page has 6 blocking script resources and 2 blocking CSS resources. This causes a delay in rendering your page.

None of the above-the-fold content on your page could be rendered without waiting for the following resources to load. Try to defer or asynchronously load blocking resources, or inline the critical portions of those resources directly in the HTML.

[Remove render-blocking JavaScript:](#)

- <https://www.funftesrad.com/wp-includes/js/jquery/jquery.js>
- <https://www.funftesrad.com/wp-content/plugins/woocommerce/assets/js/frontend/cart-fragments.min.js>
- <https://www.funftesrad.com/wp-content/themes/porto/js/libs/owl.carousel.min.js>
- <https://www.funftesrad.com/wp-content/themes/porto/js/libs/jquery.waitforimages.min.js>
- <https://www.funftesrad.com/wp-content/themes/porto/js/theme.min.js>
- <https://www.funftesrad.com/wp-content/themes/porto/js/woocommerce-theme.min.js>

[Optimize CSS Delivery](#) of the following:

- <https://www.funftesrad.com/min/c8192.css>
- <https://fonts.googleapis.com/css?family=Open+Sans:200,300,400,700,800,600%7COswald:200,300,400,700,800,600%7CAbril+Fatface:regular>

Optimize images

Mobile

Properly formatting and compressing images can save many bytes of data.

[Optimize the following images](#) to reduce their size by 140KiB (95% reduction).

- Compressing and resizing <https://www.funftesrad.com/wp-content/uploads/2019/03/0-b6d767.jpeg> could save 140KiB (95% reduction).

Prioritize visible content

Your page requires additional network round trips to render the above-the-fold content. For best performance, reduce the amount of HTML needed to render above-the-fold content.

The entire HTML response was not sufficient to render the above-the-fold content. This usually indicates that additional resources, loaded after HTML parsing, were required to render above-the-fold content. [Prioritize visible content](#) that is needed for rendering above-the-fold by including it directly in the HTML response.

- Only about 23% of the final above-the-fold content could be rendered with the full HTML response.
- [Click to see the screenshot with only the HTML response: snapshot:5](#)

Consider Fixing:

Leverage browser caching

Setting an expiry date or a maximum age in the HTTP headers for static resources instructs the browser to load previously downloaded resources from local disk rather than over the network.

[Leverage browser caching](#) for the following cacheable resources:

- <https://www.googletagmanager.com/gtm.js?id=GTM-N47SG4Q> (15 minutes)
- https://connect.facebook.net/en_US/fbevents.js (20 minutes)
- <https://connect.facebook.net/signals/config/2160446934011662?v=2.8.51&r=stable> (20 minutes)

Mobile

minutes)

- <https://connect.facebook.net/signals/plugins/inferredEvents.js?v=2.8.51> (20 minutes)
- <https://www.google-analytics.com/plugins/ua/ec.js> (60 minutes)
- <https://www.google-analytics.com/analytics.js> (2 hours)

Minify JavaScript

Compacting JavaScript code can save many bytes of data and speed up downloading, parsing, and execution time.

[Minify JavaScript](#) for the following resources to reduce their size by 2.6KiB (18% reduction).

- Minifying <https://www.funftesrad.com/min/364fd.js> could save 1.7KiB (14% reduction) after compression.
- Minifying <https://connect.facebook.net/signals/plugins/inferredEvents.js?v=2.8.51> could save 646B (85% reduction) after compression.
- Minifying <https://www.funftesrad.com/?gdbc-client=3.1.30-1561832916794> could save 225B (13% reduction) after compression.

96 / 100 User Experience

Consider Fixing:

Size tap targets appropriately

Some of the links/buttons on your webpage may be too small for a user to easily tap on a touchscreen. Consider [making these tap targets larger](#) to provide a better user experience.

The following tap targets are close to other nearby tap targets and may need additional spacing around them.

- The tap target `<ul class="products produ...oaded owl-drag">Verkauf Ausf...Schnellansicht` and 3 others are close to other tap targets.
- The tap target `<ul class="products produ...oaded owl-drag">Verkauf Ausf...Schnellansicht` and 3 others are close to other tap targets.
- The tap target `Werkzeuge` and 2 others are close to other tap targets.
- The tap target `Multi Werkzeug...l Zange 9-45mm` and 1 others are close to other tap targets.
- The tap target `<button type="button" class="minus">-</button>` and 3 others are close to other tap targets.
- The tap target `<input id="quantity_5d17add46b376" type="number" name="quantity" class="input-text qty text">` and 1 others are close to other tap targets.
- The tap target `` is close to 2 other tap targets.
- The tap target `<button type="button" class="owl-prev">` and 1 others are close to other tap targets.
- The tap target `Über Uns` and 11 others are close to other tap targets.
