🚫 Should Fix:

Eliminate render-blocking JavaScript and CSS in above-the-fold content

Your page has 1 blocking script resources. This causes a delay in rendering your page.

Approximately 13% of the above-the-fold content on your page could be rendered without waiting for the following resources to load. Try to defer or asynchronously load blocking resources, or inline the critical portions of those resources directly in the HTML.

[Remove render-blocking JavaScript](#):

- http://images.dmca.com/Badges/DMCABadgeHelper.min.js

⚠ Consider Fixing:

Mobile

Enable compression

Compressing resources with gzip or deflate can reduce the number of bytes sent over the network.

[Enable compression](#) for the following resources to reduce their transfer size by 41.4KiB (81% reduction).

- Compressing http://www.gamedanhbai.mobi/ could save 41KiB (81% reduction).
- Compressing http://images.dmca.com/Badges/DMCABadgeHelper.min.js could save 478B (56% reduction).

Leverage browser caching

Setting an expiry date or a maximum age in the HTTP headers for static resources instructs the browser to load previously downloaded resources from local disk rather than over the network.

[Leverage browser caching](#) for the following cacheable resources:

- https://cdn.ampproject.org/v0.js (50 minutes)

Minify JavaScript

Compacting JavaScript code can save many bytes of data and speed up downloading, parsing, and execution time.

[Minify JavaScript](#) for the following resources to reduce their size by 341B (41% reduction).

- Minifying http://images.dmca.com/Badges/DMCABadgeHelper.min.js could save 341B (41% reduction).

Mobile

Optimize images

Properly formatting and compressing images can save many bytes of data.

Optimize the following images to reduce their size by 3.8KiB (23% reduction).

- Compressing http://www.gamedanhbai.mobi/Content/Images/uploaded/game/logo.png could save 1.8KiB (22% reduction).

- Compressing https://images.dmca.com/Badges/dmca-badge-w150-5x1-01.png?ID=8c997a26-d030-4f22-b69a-8631890c54cd could save 1.1KiB (29% reduction).

- Compressing http://www.gamedanhbai.mobi/Themes/AMPTaiGame/Content/images/icon-tai-game-jad.jpg could save 425B (48% reduction).

- Compressing http://www.gamedanhbai.mobi/content/images/thumbs/0000027_tai-game-danh-bai-doi-thuong_125.jpeg could save 425B (13% reduction).

- Compressing http://www.gamedanhbai.mobi/Themes/AMPTaiGame/Content/images/menu-symbol-icon_354353.png could save 106B (21% reduction).

Prioritize visible content

Your page requires additional network round trips to render the above-the-fold content. For best performance, reduce the amount of HTML needed to render above-the-fold content.

50.3KiB of the HTML response was required to render the above-the-fold content. This requires 3 network round-trips. However, if the HTML response were compressed, then the HTML required to render the above-the-fold content could be delivered in just 1 network round-trips. Enable compression for the HTML response in order to prioritize the visible content for this page.

- Only about 13% of the final above-the-fold content could be rendered with the HTML delivered within 2 round-trips.

- Click to see the screenshot with 2 round trips: snapshot:2

`99 / 100` User Experience

⚠️ Consider Fixing:

Size tap targets appropriately

Some of the links/buttons on your webpage may be too small for a user to easily tap on a touchscreen. Consider [making these tap targets larger](#) to provide a better user experience.

The following tap targets are close to other nearby tap targets and may need additional spacing around them.

- The tap target <input type="submit" class="search-box-button"> is close to 1 other tap targets final.

- The tap target Cáp quang vnpt hà nội and 5 others are close to other tap targets.
