Should Fix:

### Avoid landing page redirects

Your page has 2 redirects. Redirects introduce additional delays before the page can be loaded.

[Avoid landing page redirects](#) for the following chain of redirected URLs.

- <http://government-job.info/>
- <https://government-job.info/>
- <https://www.government-job.info/>

Eliminate render-blocking JavaScript and CSS in above-the-fold content

## Mobile

Your page has 1 blocking script resources and 8 blocking CSS resources. This causes a delay in rendering your page.

None of the above-the-fold content on your page could be rendered without waiting for the following resources to load. Try to defer or asynchronously load blocking resources, or inline the critical portions of those resources directly in the HTML.

Setting an expiry date or a maximum age in the HTTP headers for static resources instructs the browser to load previously downloaded resources from local disk rather than over the network.

## Size tap targets appropriately

Some of the links/buttons on your webpage may be too small for a user to easily tap on a touchscreen. Consider [making these tap targets larger](#) to provide a better user experience.

The following tap targets are close to other nearby tap targets and may need additional spacing around them.

- The tap target `<button type="submit" class="search-submit"></button>` is close to 1 other tap targets final.
- The tap target `<i class="astra-search-icon">` is close to 1 other tap targets final.
- The tap target `<div id="abgc" class="abgc"></div>` is close to 1 other tap targets.
