Eliminate render-blocking JavaScript and CSS in above-the-fold content

Your page has 3 blocking script resources and 2 blocking CSS resources. This causes a delay in rendering your page.

None of the above-the-fold content on your page could be rendered without waiting for the following resources to load. Try to defer or asynchronously load blocking resources, or inline the critical portions of those resources directly in the HTML.

[Remove render-blocking JavaScript:](#)

- http://global.proper.io/greatergood_ctg.min.js
- <http://cdnjs.cloudflare.com/ajax/libs/jquery/1.11.3/jquery.min.js?ver=1.11.3>
- <http://greatergood.com/wp-content/themes/greatergood/javascript/scripty.js?ver=20151021>

[Optimize CSS Delivery](#) of the following:

- <http://fonts.googleapis.com/css?family=Roboto%3A300%2C400%2C500%2C700%2C900%2C300i%2C400i%2C500i%2C700i%2C900i%7CRoboto+Condensed%3A400%2C700&ver=4.6.1>
- <http://greatergood.com/wp-content/themes/greatergood/css/style-ggc.css?ver=20151021>

Consider Fixing:

Minify HTML

Compacting HTML code, including any inline JavaScript and CSS contained in it, can save many bytes of data and speed up download and parse times.

[Minify HTML](#) for the following resources to reduce their size by 3KiB (15% reduction).

- Minifying <http://greatergood.com/> could save 3KiB (15% reduction) after compression.

Optimize images

Properly formatting and compressing images can save many bytes of data.

Eliminate render-blocking JavaScript and CSS in above-the-fold content

Your page has 3 blocking script resources and 2 blocking CSS resources. This causes a delay in rendering your page.

None of the above-the-fold content on your page could be rendered without waiting for the following resources to load. Try to defer or asynchronously load blocking resources, or inline the critical portions of those resources directly in the HTML.

[Remove render-blocking JavaScript:](#)
