### How to redeem the 25-digit Office Product Key from office.com/setup?

Microsoft Office is the most popular and most used software program around the world from home to school to business. Microsoft Office software package comprises of all the essential platforms and tools to read, create and edit all types of documents and files. The program is also user-friendly. The programs and services, suite comprises of Microsoft Word, Microsoft PowerPoint, Microsoft Excel, Microsoft Access, Microsoft OneDrive, etc. There are various versions of Office suites are available. Office 2016, Office 2019, Office 2023, Office 2024, Office 2027, Office 2028 are some of them. For more details and download Microsoft Office suite visit [office.com/setup](http://office.com/setup).

#### How to download Microsoft Office Setup?

The Microsoft Office products are available online and offline both. Here are guidelines for both online and offline process for downloading Office setup.

Wherever the program can run on all types of devices, meets the necessary system requirements. Check the minimum system requirements for the Office products by going to the Microsoft account page.

Recommended minimum system requirement to run Microsoft Office smoothly.

1. Operating System - Windows 7 SP1 or all above versions and Mac OS X
2. Processor - Intel DualCore and above processor with 2.8GHz
3. RAM - At least 2GB
4. Disk - Available available up to 10GB

#### Online Process

1. Open a good web browser on your device.
2. And change to secure office.com/setup.
3. Microsoft products are on your screen, click on the Shop Products tab.
4. Click on Office from the list to open the Office product page.
5. On the Office product page various software programs are available. Use the searching bar to view the product (Microsoft Office business, students, or Home products) you are looking for.
6. Choose the package and then select the version to download.
7. Click on Download/Get button to proceed.
8. Click on Check out, after selecting products to purchase.
9. Now you need to sign with your Microsoft account (enter your account detail and log in. You can create a new account if you haven't signed up on Microsoft).
10. After sign in enter payment details.
11. Downloading link for software will appear after payment has done.
12. Click on Download/Get and download the installer.

#### Offline Process

1. Open your computer's CD/DVD Drive.

Should Fix:

Eliminate render-blocking JavaScript and CSS in above-the-fold content

Your page has 4 blocking CSS resources. This causes a delay in rendering your page.

None of the above-the-fold content on your page could be rendered without waiting for the following resources to load. Try to defer or asynchronously load blocking resources, or inline the critical portions of those resources directly in the HTML.

[Optimize CSS Delivery](#) of the following:

- <http://guru-office.com/assets/css/bootstrap.min.css>
- <http://guru-office.com/assets/css/custom.css>
- <https://fonts.googleapis.com/css?family=Poppins:300,400,500,600,700>
- <http://guru-office.com/assets/css/font-awesome.min.css>

### Optimize images

Properly formatting and compressing images can save many bytes of data.

[Optimize the following images](#) to reduce their size by 165.6KiB (48% reduction).

- Compressing <http://guru-office.com/assets/images/banner.jpg> could save 165.6KiB (48% reduction).

### Consider Fixing:

### Leverage browser caching

Setting an expiry date or a maximum age in the HTTP headers for static resources instructs the browser to load previously downloaded resources from local disk rather than over the network.

[Leverage browser caching](#) for the following cacheable resources:

- <http://guru-office.com/assets/css/bootstrap.min.css> (4 hours)
- <http://guru-office.com/assets/css/custom.css> (4 hours)
- <http://guru-office.com/assets/css/font-awesome.min.css> (4 hours)
- <http://guru-office.com/assets/images/banner.jpg> (4 hours)
- <http://guru-office.com/assets/images/logo.png> (4 hours)
- <http://guru-office.com/assets/js/script/bootstrap.min.js> (4 hours)

### Minify CSS

Compacting CSS code can save many bytes of data and speed up download and parse times.

## Mobile

[Minify CSS](#) for the following resources to reduce their size by 443B (15% reduction).

- Minifying <http://guru-office.com/assets/css/custom.css> could save 443B (15% reduction) after compression.

### 6 Passed Rules

#### Avoid landing page redirects

Your page has no redirects. Learn more about [avoiding landing page redirects](#).

#### Enable compression

You have compression enabled. Learn more about [enabling compression](#).

#### Reduce server response time

Your server responded quickly. Learn more about [server response time optimization](#).

#### Minify HTML

Your HTML is minified. Learn more about [minifying HTML](#).

#### Minify JavaScript

Your JavaScript content is minified. Learn more about [minifying JavaScript](#).

#### Prioritize visible content

You have the above-the-fold content properly prioritized. Learn more about [prioritizing visible](#)

[content.](#)

## 70 / 100 User Experience

### Should Fix:

#### Configure the viewport

Your page does not have a viewport specified. This causes mobile devices to render your page as it would appear on a desktop browser, scaling it down to fit on a mobile screen. Configure a viewport to allow your page to render properly on all devices.

[Configure a viewport](#) for this page.

#### Use legible font sizes

The following text on your page renders in a way that may be difficult for some of your visitors to read. [Use legible font sizes](#) to provide a better user experience.

The following text fragments have a small font size. Increase the font size to make them more legible.

- Office.com/setup and 4 others render only 6 pixels tall (16 CSS pixels) final.
- Let's Get Star...ice.com/setup. renders only 6 pixels tall (15 CSS pixels) final.
- Read More renders only 6 pixels tall (16 CSS pixels) final.
- Microsoft Offi...ce suite click and 7 others render only 6 pixels tall (15 CSS pixels) final.
- office.com/setup renders only 6 pixels tall (15 CSS pixels) final.
- How to downloa...Office Setup? and 2 others render only 8 pixels tall (20 CSS pixels) final.
- On the Office...e looking for. and 40 others render only 5 pixels tall (14 CSS pixels) final.
- Steps for inst...up on Windows: and 3 others render only 7 pixels tall (18 CSS pixels) final.
- www.office.com/setup renders only 5 pixels tall (14 CSS pixels) final.

## Mobile

- is an independ...o suggest that and 3 others render only 5 pixels tall (13 CSS pixels).
- guru-office.com and 2 others render only 5 pixels tall (13 CSS pixels).
- - All rights reserved. and 1 others render only 5 pixels tall (12 CSS pixels).
- office.com/setup renders only 5 pixels tall (12 CSS pixels).

### Consider Fixing:

#### Size tap targets appropriately

Some of the links/buttons on your webpage may be too small for a user to easily tap on a touchscreen. Consider [making these tap targets larger](#) to provide a better user experience.

The following tap targets are close to other nearby tap targets and may need additional spacing around them.

- The tap target `<a href="http://guru-office.com/blog/">Blog</a>` is close to 1 other tap targets final.

### 2 Passed Rules

#### Avoid plugins

Your page does not appear to use plugins, which would prevent content from being usable on many platforms. Learn more about the importance of [avoiding plugins](#).

#### Size content to viewport

The contents of your page fit within the viewport. Learn more about [sizing content to the viewport](#).
