### Eliminate render-blocking JavaScript and CSS in above-the-fold content

Your page has 13 blocking script resources and 17 blocking CSS resources. This causes a delay in rendering your page.

None of the above-the-fold content on your page could be rendered without waiting for the following resources to load. Try to defer or asynchronously load blocking resources, or inline the critical portions of those resources directly in the HTML.

#### [Remove render-blocking JavaScript:](#)

### Consider Fixing:

## Minify CSS

Compacting CSS code can save many bytes of data and speed up download and parse times.

[Minify CSS](#) for the following resources to reduce their size by 5.7KiB (20% reduction).

- Minifying <http://hpcustomer-service.com/js/rs-plugin/css/settings.css> could save 2.9KiB (29% reduction) after compression.
- Minifying <http://hpcustomer-service.com/css/style.css> could save 1.2KiB (12% reduction) after compression.
- Minifying <http://hpcustomer-service.com/css/theme-responsive.css> could save 525B (26% reduction) after compression.
- Minifying <http://hpcustomer-service.com/css/element.css> could save 304B (25% reduction)

## Mobile

after compression.

- Minifying <http://hpcustomer-service.com/css/revolution-responsive.css> could save 271B (49% reduction) after compression.
- Minifying <http://hpcustomer-service.com/css/fancybox.css> could save 223B (16% reduction) after compression.
- Minifying <http://hpcustomer-service.com/css/theme/default.css> could save 181B (11% reduction) after compression.
- Minifying <http://hpcustomer-service.com/css/theme-switcher.css> could save 131B (13% reduction) after compression.

## Minify JavaScript

Compacting JavaScript code can save many bytes of data and speed up downloading, parsing, and execution time.

[Minify JavaScript](#) for the following resources to reduce their size by 4.5KiB (40% reduction).

- Minifying <http://hpcustomer-service.com/js/jquery.sscr.js> could save 1.6KiB (41% reduction) after compression.
- Minifying <http://hpcustomer-service.com/js/theme-script.js> could save 1.2KiB (31% reduction) after compression.
- Minifying <http://hpcustomer-service.com/js/jquery.scrollUp.js> could save 792B (50% reduction) after compression.
- Minifying <http://hpcustomer-service.com/js/jquery.cookie.js> could save 564B (42% reduction) after compression.
- Minifying <http://hpcustomer-service.com/js/jquery.retina.js> could save 336B (50% reduction) after compression.

## Optimize images

Properly formatting and compressing images can save many bytes of data.

## [Mobile](#)

[Optimize the following images](#) to reduce their size by 32.7KiB (20% reduction).

- Compressing <http://hpcustomer-service.com/img/slideshow/Slider03.png> could save 18.2KiB (31% reduction).
- Compressing <http://hpcustomer-service.com/img/slideshow/terms.jpg> could save 8.8KiB (14% reduction).
- Compressing <http://hpcustomer-service.com/img/slideshow/about-us.jpg> could save 5.7KiB (13% reduction).

## Prioritize visible content

Your page requires additional network round trips to render the above-the-fold content. For best performance, reduce the amount of HTML needed to render above-the-fold content.

The entire HTML response was not sufficient to render the above-the-fold content. This usually indicates that additional resources, loaded after HTML parsing, were required to render above-the-fold content. [Prioritize visible content](#) that is needed for rendering above-the-fold by including it directly in the HTML response.

- Only about 44% of the final above-the-fold content could be rendered with the full HTML response.

## 99 / 100 User Experience

### Consider Fixing:

#### Size tap targets appropriately

Some of the links/buttons on your webpage may be too small for a user to easily tap on a touchscreen. Consider [making these tap targets larger](#) to provide a better user experience.

The following tap targets are close to other nearby tap targets and may need additional spacing around them.

- The tap target `<a href="http://hpcustomer-service.com/">hp Customer Service</a>` is close to 1 other tap targets.
- The tap target `<a href="terms.html">Term of Use</a>` is close to 1 other tap targets.
