 Should Fix:

Eliminate render-blocking JavaScript and CSS in above-the-fold content

Your page has 1 blocking script resources and 2 blocking CSS resources. This causes a delay in rendering your page.

None of the above-the-fold content on your page could be rendered without waiting for the following resources to load. Try to defer or asynchronously load blocking resources, or inline the critical portions of those resources directly in the HTML.

[Remove render-blocking JavaScript:](#)

- <http://www-jp.mysql.com/common/js/site-20160129.min.js>

[Optimize CSS Delivery](#) of the following:

- <http://www-jp.mysql.com/common/css/main-20160912.min.css>
- <http://www-jp.mysql.com/common/css/page-20160912.min.css>

Consider Fixing:

Minify HTML

Compacting HTML code, including any inline JavaScript and CSS contained in it, can save many bytes of data and speed up download and parse times.

[Minify HTML](#) for the following resources to reduce their size by 516B (11% reduction).

- Minifying <http://www.mysql.com/> could save 516B (11% reduction) after compression.

Minify JavaScript

Compacting JavaScript code can save many bytes of data and speed up downloading, parsing, and execution time.

[Minify JavaScript](#) for the following resources to reduce their size by 2.5KiB (14% reduction).

- Minifying http://www.mysql.com/common/js/metrics/metrics_group1.js could save 2.5KiB (14% reduction) after compression.

Optimize images

Properly formatting and compressing images can save many bytes of data.

[Optimize the following images](#) to reduce their size by 2.8KiB (29% reduction).

- Compressing <http://www.mysql.com/common/themes/sakila/banners/b2560-grey-gradient-background.jpg> could save 985B (48% reduction).

Mobile

- Compressing <http://www.mysql.com/common/themes/sakila/banners/b2560-mysql-cloud-service-back.jpg> could save 982B (29% reduction).
- Compressing <http://www-jp.mysql.com/common/themes/sakila/site-sprite1.png> could save 890B (20% reduction).

Avoid landing page redirects

Your page has no redirects. Learn more about [avoiding landing page redirects](#).

Enable compression

You have compression enabled. Learn more about [enabling compression](#).

Leverage browser caching

You have enabled browser caching. Learn more about [browser caching recommendations](#).

Reduce server response time

Your server responded quickly. Learn more about [server response time optimization](#).

Minify CSS

Your CSS is minified. Learn more about [minifying CSS](#).

Prioritize visible content

You have the above-the-fold content properly prioritized. Learn more about [prioritizing visible](#)

[content](#).

99 / 100 User Experience

Consider Fixing:

Size tap targets appropriately

Some of the links/buttons on your webpage may be too small for a user to easily tap on a touchscreen. Consider [making these tap targets larger](#) to provide a better user experience.

The following tap targets are close to other nearby tap targets and may need additional spacing around them.

- The tap target `<button type="submit" class="l1-search-btn"></button>` is close to 1 other tap targets final.
- The tap target `<button type="submit" class="l1-search-btn"></button>` is close to 1 other tap targets final.
- The tap target `More Countries »` is close to 1 other tap targets.
- The tap target `Contact Us Online »` is close to 1 other tap targets.
