

# PageSpeed Insights

## Mobile

71 / 100 Speed

 Should Fix:

### Eliminate render-blocking JavaScript and CSS in above-the-fold content

Your page has 2 blocking script resources and 5 blocking CSS resources. This causes a delay in rendering your page.

None of the above-the-fold content on your page could be rendered without waiting for the following resources to load. Try to defer or asynchronously load blocking resources, or inline the critical portions of those resources directly in the HTML.

#### Remove render-blocking JavaScript:

- <https://code.jquery.com/jquery-latest.min.js>
- <https://mywifixedt.net/js/script-menu.js>

#### Optimize CSS Delivery of the following:

- <https://fonts.googleapis.com/css?family=Archivo+Narrow>

## Mobile

- <https://fonts.googleapis.com/css?family=Abel>
- <https://fonts.googleapis.com/css?family=Open+Sans+Condensed:300>
- <https://mywifiextnet.net/css/bootstrap.min.css>
- <https://mywifiextnet.net/css/style-menu.css>

### Consider Fixing:

#### Minify HTML

Compacting HTML code, including any inline JavaScript and CSS contained in it, can save many bytes of data and speed up download and parse times.

[Minify HTML](#) for the following resources to reduce their size by 886B (11% reduction).

- Minifying <https://mywifiextnet.net/> could save 886B (11% reduction) after compression.

#### Minify JavaScript

Compacting JavaScript code can save many bytes of data and speed up downloading, parsing, and execution time.

[Minify JavaScript](#) for the following resources to reduce their size by 141B (16% reduction).

- Minifying <https://mywifiextnet.net/js/script-menu.js> could save 141B (16% reduction) after compression.

#### Optimize images

## Mobile

Properly formatting and compressing images can save many bytes of data.

[Optimize the following images](#) to reduce their size by 14.2KiB (48% reduction).

- Compressing <https://mywifiextnet.net/images/footer.png> could save 10KiB (53% reduction).
- Compressing <https://mywifiextnet.net/images/call-service.png> could save 1.2KiB (38% reduction).
- Compressing <https://mywifiextnet.net/images/free-img.png> could save 1.2KiB (44% reduction).
- Compressing <https://mywifiextnet.net/images/experience.png> could save 1.2KiB (37% reduction).
- Compressing <https://mywifiextnet.net/images/logo.png> could save 551B (27% reduction).

### 6 Passed Rules

#### Avoid landing page redirects

Your page has no redirects. Learn more about [avoiding landing page redirects](#).

#### Enable compression

You have compression enabled. Learn more about [enabling compression](#).

#### Leverage browser caching

You have enabled browser caching. Learn more about [browser caching recommendations](#).

#### Reduce server response time

Your server responded quickly. Learn more about [server response time optimization](#).

# Mobile

## Minify CSS

Your CSS is minified. Learn more about [minifying CSS](#).

## Prioritize visible content

You have the above-the-fold content properly prioritized. Learn more about [prioritizing visible content](#).

## 98 / 100 User Experience

### Consider Fixing:

#### Size tap targets appropriately

Some of the links/buttons on your webpage may be too small for a user to easily tap on a touchscreen. Consider [making these tap targets larger](#) to provide a better user experience.

The following tap targets are close to other nearby tap targets and may need additional spacing around them.

- The tap target `<a href="https://www.my...xtender-setup/">Netgear EX6150</a>` and 3 others are close to other tap targets.
- The tap target `<a href="index.html">Home</a>` and 9 others are close to other tap targets.

### 4 Passed Rules

#### Avoid plugins

Your page does not appear to use plugins, which would prevent content from being usable on many platforms. Learn more about the importance of [avoiding plugins](#).

# Mobile

## Configure the viewport

Your page specifies a viewport matching the device's size, which allows it to render properly on all devices. Learn more about [configuring viewports](#).

## Size content to viewport

The contents of your page fit within the viewport. Learn more about [sizing content to the viewport](#).

## Use legible font sizes

The text on your page is legible. Learn more about [using legible font sizes](#).

# Desktop

87 / 100 Speed

Should Fix:

## Eliminate render-blocking JavaScript and CSS in above-the-fold content

Your page has 3 blocking script resources and 5 blocking CSS resources. This causes a delay in rendering your page.

## Desktop

None of the above-the-fold content on your page could be rendered without waiting for the following resources to load. Try to defer or asynchronously load blocking resources, or inline the critical portions of those resources directly in the HTML.

### [Remove render-blocking JavaScript:](#)

- <https://code.jquery.com/jquery-latest.min.js>
- <https://mywifiextnet.net/js/script-menu.js>
- <https://mywifiextnet.net/js/bootstrap.min.js>

### [Optimize CSS Delivery](#) of the following:

- <https://fonts.googleapis.com/css?family=Archivo+Narrow>
- <https://fonts.googleapis.com/css?family=Abel>
- <https://fonts.googleapis.com/css?family=Open+Sans+Condensed:300>
- <https://mywifiextnet.net/css/bootstrap.min.css>
- <https://mywifiextnet.net/css/style-menu.css>

## Consider Fixing:

### Minify HTML

Compacting HTML code, including any inline JavaScript and CSS contained in it, can save many bytes of data and speed up download and parse times.

[Minify HTML](#) for the following resources to reduce their size by 886B (11% reduction).

- Minifying <https://mywifiextnet.net/> could save 886B (11% reduction) after compression.

### Minify JavaScript

Compacting JavaScript code can save many bytes of data and speed up downloading, parsing, and execution time.

## Desktop

[Minify JavaScript](#) for the following resources to reduce their size by 141B (16% reduction).

- Minifying <https://mywifiextnet.net/js/script-menu.js> could save 141B (16% reduction) after compression.

## Optimize images

Properly formatting and compressing images can save many bytes of data.

[Optimize the following images](#) to reduce their size by 14.2KiB (48% reduction).

- Compressing <https://mywifiextnet.net/images/footer.png> could save 10KiB (53% reduction).
- Compressing <https://mywifiextnet.net/images/call-service.png> could save 1.2KiB (38% reduction).
- Compressing <https://mywifiextnet.net/images/free-img.png> could save 1.2KiB (44% reduction).
- Compressing <https://mywifiextnet.net/images/experience.png> could save 1.2KiB (37% reduction).
- Compressing <https://mywifiextnet.net/images/logo.png> could save 551B (27% reduction).

## Prioritize visible content

Your page requires additional network round trips to render the above-the-fold content. For best performance, reduce the amount of HTML needed to render above-the-fold content.

The entire HTML response was not sufficient to render the above-the-fold content. This usually indicates that additional resources, loaded after HTML parsing, were required to render above-the-fold content. [Prioritize visible content](#) that is needed for rendering above-the-fold by including it directly in the HTML response.

- Only about 33% of the final above-the-fold content could be rendered with the full HTML response.

## Desktop

- Click to see the screenshot with only the HTML response: snapshot:10
