⬛ Should Fix:

Eliminate render-blocking JavaScript and CSS in above-the-fold content

Your page has 8 blocking script resources and 4 blocking CSS resources. This causes a delay in rendering your page.

None of the above-the-fold content on your page could be rendered without waiting for the following resources to load. Try to defer or asynchronously load blocking resources, or inline the critical portions of those resources directly in the HTML.

Optimize the following images to reduce their size by 223.2KiB (50% reduction).

🔶 Consider Fixing:

Enable compression

Compressing resources with gzip or deflate can reduce the number of bytes sent over the network.

Enable compression for the following resources to reduce their transfer size by 19.2KiB (62% reduction).

- Compressing http://icdn.netbarg.com/assets/site/js/weblibraryFooter.js could save 14.7KiB (62% reduction).

- Compressing https://d31qbv1cthcecs.cloudfront.net/atrk.js could save 2.2KiB (61% reduction).

Leverage browser caching

Setting an expiry date or a maximum age in the HTTP headers for static resources instructs the browser to load previously downloaded resources from local disk rather than over the network.

Leverage browser caching for the following cacheable resources:

- https://api.segment.io/v1/p (expiration not specified)

- http://cdn.segment.com/analytics.js/v1/GCq0z3R1aeZjTx7wLvljRKbPp0Sw0KGM/analytics.min.js (2 minutes)

- http://www.google-analytics.com/analytics.js (2 hours)

Minify HTML

Compacting HTML code, including any inline JavaScript and CSS contained in it, can save many bytes of data and speed up download and parse times.

Minify HTML for the following resources to reduce their size by 2.3KiB (11% reduction).

- Minifying http://netbarg.com/ could save 2.3KiB (11% reduction) after compression.

Size tap targets appropriately

Some of the links/buttons on your webpage may be too small for a user to easily tap on a touchscreen. Consider [making these tap targets larger](#) to provide a better user experience.

The following tap targets are close to other nearby tap targets and may need additional spacing around them.

- The tap target دریافت اپلیکیشن نت برگ is close 1 to other tap targets final.
