Eliminate render-blocking JavaScript and CSS in above-the-fold content

Your page has 6 blocking script resources and 10 blocking CSS resources. This causes a delay in rendering your page.

None of the above-the-fold content on your page could be rendered without waiting for the following

resources to load. Try to defer or asynchronously load blocking resources, or inline the critical portions of those resources directly in the HTML.

[Remove render-blocking JavaScript]():

- http://cdnjs.cloudflare.com/ajax/libs/jquery/3.2.1/jquery.min.js

- http://cdnjs.cloudflare.com/ajax/libs/jstimezonedetect/1.0.6/jstz.min.js

- http://officecom-setup.com/js/jquery.js

- http://officecom-setup.com/js/bootstrap.min.js

- http://officecom-setup.com/js/jquery.flexslider.js

- http://officecom-setup.com/js/custom.js

[Optimize CSS Delivery]() of the following:

- http://officecom-setup.com/css/bootstrap.min.css

- http://officecom-setup.com/css/fancybox/jquery.fancybox.css

- http://officecom-setup.com/css/jcarousel.html

- http://officecom-setup.com/css/flexslider.css

- http://officecom-setup.com/js/owl-carousel/owl.carousel.html

- http://officecom-setup.com/et-line-font/style.css

- http://officecom-setup.com/css/style.css

- http://officecom-setup.com/css/font-awesome.css

- http://officecom-setup.com/css/animate.css

- https://fonts.googleapis.com/css?family=Open+Sans|Saira:300,400,500,700

🔲 Consider Fixing:

Enable compression

Compressing resources with gzip or deflate can reduce the number of bytes sent over the network.

[Enable compression](#) for the following resources to reduce their transfer size by 10.7KiB (68% reduction).

- Compressing http://officecom-setup.com/js/jquery.isotope.min.js could save 10.7KiB (68% reduction).

Minify CSS

Compacting CSS code can save many bytes of data and speed up download and parse times.

[Minify CSS](#) for the following resources to reduce their size by 3.6KiB (21% reduction).

- Minifying http://officecom-setup.com/css/style.css could save 1.4KiB (20% reduction) after compression.

- Minifying http://officecom-setup.com/css/animate.css could save 1.3KiB (23% reduction) after compression.

- Minifying http://officecom-setup.com/css/flexslider.css could save 469B (33% reduction) after compression.

- Minifying http://officecom-setup.com/css/fancybox/jquery.fancybox.css could save 208B (14% reduction) after compression.

- Minifying http://officecom-setup.com/et-line-font/style.css could save 186B (12% reduction) after compression.

Minify JavaScript

Compacting JavaScript code can save many bytes of data and speed up downloading, parsing, and execution time.

[Minify JavaScript](#) for the following resources to reduce their size by 8.5KiB (32% reduction).

- Minifying http://officecom-setup.com/js/jquery.flexslider.js could save 3.2KiB (37% reduction) after compression.

- Minifying http://officecom-setup.com/js/custom.js could save 1.5KiB (62% reduction) after compression.

- Minifying http://officecom-setup.com/js/modernizr.custom.js could save 1.2KiB (16% reduction) after compression.

- Minifying http://officecom-setup.com/js/jquery.easing.1.3.js could save 1.1KiB (58% reduction) after compression.

- Minifying http://officecom-setup.com/js/jquery.fancybox-media.js could save 851B (45% reduction) after compression.

- Minifying http://script.opentracker.net/?site=officecom-setup.com could save 434B (14% reduction) after compression.

- Minifying http://officecom-setup.com/js/animate.js could save 177B (20% reduction) after compression.

Optimize images

Properly formatting and compressing images can save many bytes of data.

Optimize the following images to reduce their size by 22.6KiB (18% reduction).

- Compressing http://officecom-setup.com/img/slides/1.jpg could save 11.3KiB (18% reduction).

- Compressing http://officecom-setup.com/img/slides/2.jpg could save 10.4KiB (17% reduction).

- Compressing http://officecom-setup.com/img/logo.png could save 641B (34% reduction).

- Compressing http://officecom-setup.com/img/bg_direction_nav.png could save 238B (37% reduction).

Prioritize visible content

Your page requires additional network round trips to render the above-the-fold content. For best performance, reduce the amount of HTML needed to render above-the-fold content.

The entire HTML response was not sufficient to render the above-the-fold content. This usually

indicates that additional resources, loaded after HTML parsing, were required to render above-the-fold content. [Prioritize visible content](#) that is needed for rendering above-the-fold by including it directly in the HTML response.

- Only about 54% of the final above-the-fold content could be rendered with the full HTML response.

- Click to see the screenshot with only the HTML response: snapshot:16
