Eliminate render-blocking JavaScript and CSS in above-the-fold content

Your page has 10 blocking script resources and 11 blocking CSS resources. This causes a delay in rendering your page.

Mobile

None of the above-the-fold content on your page could be rendered without waiting for the following resources to load. Try to defer or asynchronously load blocking resources, or inline the critical portions of those resources directly in the HTML.

- Minifying <http://quickhelpnumber.com/assets/css/flexslider.css> could save 470B (33% reduction) after compression.
- Minifying <http://quickhelpnumber.com/assets/css/sequence.css> could save 286B (23% reduction) after compression.
- Minifying <http://quickhelpnumber.com/assets/color/default.css> could save 231B (20% reduction) after compression.

Minify HTML

Compacting HTML code, including any inline JavaScript and CSS contained in it, can save many bytes of data and speed up download and parse times.

[Minify HTML](#) for the following resources to reduce their size by 482B (11% reduction).

- Minifying <http://quickhelpnumber.com/> could save 482B (11% reduction) after compression.

Minify JavaScript

Compacting JavaScript code can save many bytes of data and speed up downloading, parsing, and execution time.

[Minify JavaScript](#) for the following resources to reduce their size by 8KiB (33% reduction).

- Minifying <http://quickhelpnumber.com/assets/js/jquery.flexslider.js> could save 3.2KiB (37% reduction) after compression.
- Minifying <http://quickhelpnumber.com/assets/js/bootstrap.js> could save 2.7KiB (26% reduction) after compression.
- Minifying <http://quickhelpnumber.com/assets/js/jquery.easing.js> could save 1.1KiB (58% reduction) after compression.
- Minifying <http://quickhelpnumber.com/assets/js/hover/jquery-hover-effect.js> could save 554B (37% reduction) after compression.
- Minifying <http://quickhelpnumber.com/assets/js/custom.js> could save 405B (22% reduction) after compression.

Optimize images

Properly formatting and compressing images can save many bytes of data.

[Optimize the following images](#) to reduce their size by 31.5KiB (28% reduction).

- Compressing <http://quickhelpnumber.com/images/quicken-slider.png> could save 26.5KiB (28% reduction).

Prioritize visible content

Your page requires additional network round trips to render the above-the-fold content. For best performance, reduce the amount of HTML needed to render above-the-fold content.

The entire HTML response was not sufficient to render the above-the-fold content. This usually indicates that additional resources, loaded after HTML parsing, were required to render above-the-fold content. [Prioritize visible content](#) that is needed for rendering above-the-fold by including it directly in the HTML response.

- Only about 60% of the final above-the-fold content could be rendered with the full HTML response.
