⚠ Should Fix:

Eliminate render-blocking JavaScript and CSS in above-the-fold content

Your page has 1 blocking script resources and 24 blocking CSS resources. This causes a delay in rendering your page.

None of the above-the-fold content on your page could be rendered without waiting for the following resources to load. Try to defer or asynchronously load blocking resources, or inline the critical portions of those resources directly in the HTML.

Remove render-blocking JavaScript:

Leverage browser caching

Setting an expiry date or a maximum age in the HTTP headers for static resources instructs the browser to load previously downloaded resources from local disk rather than over the network.

Minify CSS

Compacting CSS code can save many bytes of data and speed up download and parse times.

Minify CSS for the following resources to reduce their size by 6.4KiB (24% reduction).

- Minifying http://router-loginnet.com/wp-content/themes/sydney/style.css?ver=20180710 could save 3.4KiB (22% reduction) after compression.

- Minifying http://router-loginnet.com/wp-content/plugins/cyclone-slider/templates/standard/style.css?ver=3.2.0 could save 539B (34% reduction) after compression.

- Minifying http://router-loginnet.com/wp-content/plugins/cyclone-slider/templates/dark/style.css?ver=3.2.0 could save 531B (33% reduction) after compression.

- Minifying http://router-loginnet.com/wp-content/plugins/cyclone-slider/templates/thumbnails/style.css?ver=3.2.0 could save 489B (35% reduction) after compression.
