Eliminate render-blocking JavaScript and CSS in above-the-fold content

Your page has 6 blocking script resources and 5 blocking CSS resources. This causes a delay in rendering your page.

None of the above-the-fold content on your page could be rendered without waiting for the following resources to load. Try to defer or asynchronously load blocking resources, or inline the critical portions of those resources directly in the HTML.

[Remove render-blocking JavaScript](#):

- http://cdnjs.cloudflare.com/ajax/libs/jquery/2.1.3/jquery.min.js

- http://assets.over-blog-kiwi.com/b/blog/build/main.d1b414d0.js

- http://assets.over-blog-kiwi.com/b/blog/bundles/overblogblogblog/js/h.js?v1.4.8.0

- http://assets.over-blog-kiwi.com/b/blog/bundles/overblogblogblog/js/hideonscroll.js?v1.4.8.0

- http://assets.over-blog-kiwi.com/blog/js/index.js?v1.4.8.0

- http://assets.over-blog-kiwi.com/b/blog/bundles/overblogblogblog/js/ads.js?v1.4.8.0

[Optimize CSS Delivery](#) of the following:

- http://assets.over-blog-kiwi.com/b/blog/bundles/overblogblogblog/css/ob-style.css?v1.4.8.0

- http://cdnjs.cloudflare.com/ajax/libs/normalize/3.0.2/normalize.min.css

- http://cdnjs.cloudflare.com/ajax/libs/font-awesome/4.3.0/css/font-awesome.min.css

- http://fonts.googleapis.com/css?family=Lato:400,700,900

- http://fonts.googleapis.com/css?family=Roboto

Mobile

⚠ Consider Fixing:

Enable compression

Compressing resources with gzip or deflate can reduce the number of bytes sent over the network.

Enable compression for the following resources to reduce their transfer size by 86.1KiB (72% reduction).

- Compressing https://j.adlooxtracking.com/ads/js/tfav_adl_262.js could save 85.7KiB (72% reduction).
- Compressing https://widgets.outbrain.com/nanoWidget/externals/cookie/test.html could save 255B (42% reduction).
- Compressing https://widgets.outbrain.com/nanoWidget/externals/cookie/put.html could save 134B (33% reduction).

Minify HTML

Compacting HTML code, including any inline JavaScript and CSS contained in it, can save many bytes of data and speed up download and parse times.

Minify HTML for the following resources to reduce their size by 1.7KiB (19% reduction).

- Minifying http://sewingstitches.over-blog.com/ could save 1.6KiB (19% reduction) after compression.
- Minifying https://widgets.outbrain.com/nanoWidget/externals/cookie/test.html could save 125B (21% reduction).

Minify JavaScript

Compacting JavaScript code can save many bytes of data and speed up downloading, parsing, and

execution time.

[Minify JavaScript](#) for the following resources to reduce their size by 48KiB (41% reduction).

- Minifying https://j.adlooxtracking.com/ads/js/tfav_adl_262.js could save 47.8KiB (41% reduction).

- Minifying http://assets.over-blog-kiwi.com/b/blog/bundles/overblogblogblog/js/h.js?v1.4.8.0 could save 263B (23% reduction) after compression.

Prioritize visible content

Your page requires additional network round trips to render the above-the-fold content. For best performance, reduce the amount of HTML needed to render above-the-fold content.

The entire HTML response was not sufficient to render the above-the-fold content. This usually indicates that additional resources, loaded after HTML parsing, were required to render above-the-fold content. [Prioritize visible content](#) that is needed for rendering above-the-fold by including it directly in the HTML response.

- Only about 63% of the final above-the-fold content could be rendered with the full HTML response.

- Click to see the screenshot with only the HTML response: snapshot:11

98 / 100 User Experience

⚠ Consider Fixing:

Size tap targets appropriately

Some of the links/buttons on your webpage may be too small for a user to easily tap on a touchscreen. Consider making these tap targets larger to provide a better user experience.

The following tap targets are close to other nearby tap targets and may need additional spacing around them.

- The tap target is close to 1 other tap targets final.

- The tap target is close to 2 other tap targets final.

- The tap target Politique de confidentialité and 1 others are close to other tap targets final.

- The tap target <a>Nos partenaires is close to 1 other tap targets final.
