69 / 100 Speed

🚫 Should Fix:

Eliminate render-blocking JavaScript and CSS in above-the-fold content

Your page has 4 blocking CSS resources. This causes a delay in rendering your page.

None of the above-the-fold content on your page could be rendered without waiting for the following resources to load. Try to defer or asynchronously load blocking resources, or inline the critical portions of those resources directly in the HTML.

Optimize CSS Delivery of the following:

- https://a.slack-edge.com/e008a/style/rollup-brand.css

- https://a.slack-edge.com/db67f/style/where_work_happens.css

- https://a.slack-edge.com/6eb18/style/marketing_enterprise_banner.css

- https://a.slack-edge.com/657a/style/page_campaign.css

Mobile

🔶 Consider Fixing:

Leverage browser caching

Setting an expiry date or a maximum age in the HTTP headers for static resources instructs the browser to load previously downloaded resources from local disk rather than over the network.

Leverage browser caching for the following cacheable resources:

- https://s.adroll.com/j/roundtrip.js (5 minutes)

- https://s.adroll.com/pixel/4UHU5P4P3FESHLUMNBLWAU/QCM34G7NBZEHHATIFDIUBJ/K2HN2 U4VSJGOVKC2WJLQNH.js (5 minutes)

- https://www.googletagmanager.com/gtm.js?id=GTM-KH2LPK (15 minutes)

- https://connect.facebook.net/en_US/fbevents.js (20 minutes)

- https://d1ivexoxmp59q7.cloudfront.net/slack/live.js (60 minutes)

- https://www.google-analytics.com/analytics.js (2 hours)

- https://snap.licdn.com/li.lms-analytics/insight.min.js (7.4 hours)

Minify HTML

Compacting HTML code, including any inline JavaScript and CSS contained in it, can save many bytes of data and speed up download and parse times.

Minify HTML for the following resources to reduce their size by 663B (12% reduction).

- Minifying https://slack.com/ could save 663B (12% reduction) after compression.

97 / 100 User Experience

Mobile

⬛ Consider Fixing:

Size tap targets appropriately

Some of the links/buttons on your webpage may be too small for a user to easily tap on a touchscreen. Consider making these tap targets larger to provide a better user experience.

The following tap targets are close to other nearby tap targets and may need additional spacing around them.

- The tap target <button class="enterprise_banner__dismiss">Hide announcement</button> is close to 1 other tap targets final.

- The tap target <div class="col span_1_of_4 nav_col">Handy Links...rk Status</div> is close to 1 other tap targets.

- The tap target is close to 2 other tap targets.

- The tap target is close to 2 other tap targets.

- The tap target Contact Us is close to 1 other tap targets.

- The tap target and 1 others are close to other tap targets.
