Should Fix:

### Eliminate render-blocking JavaScript and CSS in above-the-fold content

Your page has 4 blocking script resources and 2 blocking CSS resources. This causes a delay in rendering your page.

None of the above-the-fold content on your page could be rendered without waiting for the following resources to load. Try to defer or asynchronously load blocking resources, or inline the critical portions of those resources directly in the HTML.

#### [Remove render-blocking JavaScript:](#)

- <http://fonts.googleapis.com/css?family=Dosis:400,300,200,500%27|Open+Sans%27>

## Optimize images

Properly formatting and compressing images can save many bytes of data.

[Optimize the following images](#) to reduce their size by 111.5KiB (50% reduction).

- Compressing <http://d1sj3yrs7ojvv7.cloudfront.net/extensions/img/media/media.png> could save 49.7KiB (75% reduction).
- Compressing <http://d1sj3yrs7ojvv7.cloudfront.net/extensions/img/movie/bg.jpg> could save 24.7KiB (25% reduction).
- Compressing <http://d1sj3yrs7ojvv7.cloudfront.net/extensions/img/movie/btn.png> could save 19.1KiB (88% reduction).
- Compressing [http://d1sj3yrs7ojvv7.cloudfront.net/extensions/img/shtrud\\_w.png](http://d1sj3yrs7ojvv7.cloudfront.net/extensions/img/shtrud_w.png) could save 14.1KiB (92% reduction).
- Compressing <http://d1sj3yrs7ojvv7.cloudfront.net/extensions/img/tb.png> could save 3KiB (19% reduction).
- Compressing <http://d1sj3yrs7ojvv7.cloudfront.net/external/img/p/cancelpop.png> could save 1KiB (30% reduction).

### Consider Fixing:

## Leverage browser caching

Setting an expiry date or a maximum age in the HTTP headers for static resources instructs the browser to load previously downloaded resources from local disk rather than over the network.

[Leverage browser caching](#) for the following cacheable resources:

## 75 / 100 User Experience

### Should Fix:

#### Configure the viewport

Your page does not have a viewport specified. This causes mobile devices to render your page as it would appear on a desktop browser, scaling it down to fit on a mobile screen. Configure a viewport to allow your page to render properly on all devices.

[Configure a viewport](#) for this page.

#### Use legible font sizes

The following text on your page renders in a way that may be difficult for some of your visitors to read. [Use legible font sizes](#) to provide a better user experience.

## Mobile

The following text fragments have a small font size. Increase the font size to make them more legible.

- TVPlusNewtab - The must-have and 1 others render only 7 pixels tall (18 CSS pixels) final.
- Chrome New Tab renders only 7 pixels tall (18 CSS pixels) final.
- Some services...lled for free. and 7 others render only 7 pixels tall (18 CSS pixels) final.
- Any third part...ed or implied. and 7 others render only 5 pixels tall (12 CSS pixels) final.
- Terms & Conditions and 2 others render only 5 pixels tall (12 CSS pixels) final.

### Consider Fixing:

#### Size tap targets appropriately

Some of the links/buttons on your webpage may be too small for a user to easily tap on a touchscreen. Consider [making these tap targets larger](#) to provide a better user experience.

The following tap targets are close to other nearby tap targets and may need additional spacing around them.

- The tap target `<a href="/uninstall">Uninstall</a>` is close to 1 other tap targets final.
