Should Fix:

Eliminate render-blocking JavaScript and CSS in above-the-fold content

Your page has 9 blocking script resources and 6 blocking CSS resources. This causes a delay in rendering your page.

None of the above-the-fold content on your page could be rendered without waiting for the following resources to load. Try to defer or asynchronously load blocking resources, or inline the critical portions of those resources directly in the HTML.

[Remove render-blocking JavaScript:](#)

Should Fix:

Configure the viewport

Your page uses a legacy HandheldFriendly meta tag, which instructs some browsers that your page is optimized for mobile. Other browsers, including those on iOS, will render your page as it would appear on a desktop browser.

While the HandheldFriendly tag instructs some mobile devices to display the page at the device's width, it should be replaced with a [meta viewport](#) specifying `<meta name=viewport width=device-width>` to increase compatibility.

Consider Fixing:

Size tap targets appropriately

Some of the links/buttons on your webpage may be too small for a user to easily tap on a touchscreen. Consider [making these tap targets larger](#) to provide a better user experience.

The following tap targets are close to other nearby tap targets and may need additional spacing around them.

- The tap target `Official Site` and 2 others are close to other tap targets final.
- The tap target `<div class="owl-carousel-b...usel owl-theme">WHAT'S NEW WIT...es in One Year</div>` and 5 others are close to other tap targets final.

Eliminate render-blocking JavaScript and CSS in above-the-fold content

Your page has 12 blocking script resources and 6 blocking CSS resources. This causes a delay in rendering your page.

None of the above-the-fold content on your page could be rendered without waiting for the following resources to load. Try to defer or asynchronously load blocking resources, or inline the critical portions of those resources directly in the HTML.
