Should Fix:

## Avoid landing page redirects

Your page has 2 redirects. Redirects introduce additional delays before the page can be loaded.

[Avoid landing page redirects](#) for the following chain of redirected URLs.

- <http://wp.com/>
- <https://wp.com/>
- <https://wordpress.com/>

Eliminate render-blocking JavaScript and CSS in above-the-fold content

## Mobile

Your page has 1 blocking script resources and 3 blocking CSS resources. This causes a delay in rendering your page.

None of the above-the-fold content on your page could be rendered without waiting for the following resources to load. Try to defer or asynchronously load blocking resources, or inline the critical portions of those resources directly in the HTML.

### [Remove render-blocking JavaScript:](#)

- <https://s1.wp.com/home.logged-out/js/modernizr.js?v=1446464239>

### [Optimize CSS Delivery](#) of the following:

- <https://s1.wp.com/i/fonts/merriweather/merriweather.css?v=20160222>
- <https://fonts.googleapis.com/css?family=Merriweather+Sans:400,300,300italic>
- <https://s1.wp.com/home.logged-out/css/user-segments-plans.css?v=1476955995>

## Consider Fixing:

### Leverage browser caching

Setting an expiry date or a maximum age in the HTTP headers for static resources instructs the browser to load previously downloaded resources from local disk rather than over the network.

### [Leverage browser caching](#) for the following cacheable resources:

- [https://secure.leadback.advertising.com/adcedge/lb?site=695501&betr=sslbet\\_1472760417=\[+\]ssprlb\\_1472760417\[720\]|sslbet\\_1472760452=\[+\]ssprlb\\_1472760452\[8760\]](https://secure.leadback.advertising.com/adcedge/lb?site=695501&betr=sslbet_1472760417=[+]ssprlb_1472760417[720]|sslbet_1472760452=[+]ssprlb_1472760452[8760]) (60 minutes)

## Prioritize visible content

You have the above-the-fold content properly prioritized. Learn more about [prioritizing visible content](#).

# Mobile

## Consider Fixing:

### Size tap targets appropriately

Some of the links/buttons on your webpage may be too small for a user to easily tap on a touchscreen. Consider [making these tap targets larger](#) to provide a better user experience.

The following tap targets are close to other nearby tap targets and may need additional spacing around them.

- The tap target `<a href="https://wordpress.com/about/">About Us</a>` and 1 others are close to other tap targets.

## 5 Passed Rules

### Avoid app install interstitials that hide content

Your page does not appear to have any app install interstitials that hide a significant amount of content. Learn more about the importance of [avoiding the use of app install interstitials](#).

### Avoid plugins

Your page does not appear to use plugins, which would prevent content from being usable on many platforms. Learn more about the importance of [avoiding plugins](#).

### Configure the viewport

Your page specifies a viewport matching the device's size, which allows it to render properly on all devices. Learn more about [configuring viewports](#).

### Size content to viewport

## Mobile

The contents of your page fit within the viewport. Learn more about [sizing content to the viewport](#).

### Use legible font sizes

The text on your page is legible. Learn more about [using legible font sizes](#).

# Desktop

## Prioritize visible content

Your page requires additional network round trips to render the above-the-fold content. For best performance, reduce the amount of HTML needed to render above-the-fold content.

The entire HTML response was not sufficient to render the above-the-fold content. This usually indicates that additional resources, loaded after HTML parsing, were required to render above-the-fold content. [Prioritize visible content](#) that is needed for rendering above-the-fold by including it directly in the HTML response.

- Only about 28% of the final above-the-fold content could be rendered with the full HTML response snapshot:6.
