Should Fix:

Eliminate render-blocking JavaScript and CSS in above-the-fold content

Your page has 10 blocking script resources and 9 blocking CSS resources. This causes a delay in rendering your page.

None of the above-the-fold content on your page could be rendered without waiting for the following resources to load. Try to defer or asynchronously load blocking resources, or inline the critical portions of those resources directly in the HTML.

Consider Fixing:

Leverage browser caching

Mobile

Setting an expiry date or a maximum age in the HTTP headers for static resources instructs the browser to load previously downloaded resources from local disk rather than over the network.

[Leverage browser caching](#) for the following cacheable resources:

- <http://www.yjc.ir/client/themes/fa/main/img/logo.gif> (expiration not specified)
- http://www.yjc.ir/files/adv//12_715.jpg (expiration not specified)
- http://www.yjc.ir/files/adv//17_485.jpg (expiration not specified)
- http://www.yjc.ir/files/adv//18_916.jpg (expiration not specified)
- <http://www.google-analytics.com/analytics.js> (2 hours)

Minify HTML

Compacting HTML code, including any inline JavaScript and CSS contained in it, can save many bytes of data and speed up download and parse times.

[Minify HTML](#) for the following resources to reduce their size by 4.9KiB (11% reduction).

- Minifying <http://www.yjc.ir/> could save 4.9KiB (11% reduction) after compression.

Consider Fixing:

Size tap targets appropriately

Some of the links/buttons on your webpage may be too small for a user to easily tap on a touchscreen. Consider [making these tap targets larger](#) to provide a better user experience.

The following tap targets are close to other nearby tap targets and may need additional spacing around them.

- The tap target `` is close to 2 other tap targets final.
- The tap target `<input id="search_input" type="text" name="query" class="search_input2">` is close to 1 other tap targets final.
- The tap target `اخبار آرشیو` is close
